Task 1

Objectives:

- Learn how to use GPIOs in both register level, and HAL level
- Suggested Course: Ahmed Eldeeb –8 الدرس
- Reference Manual Link : Book

Deliverables:

- Snake Effect
  Connect 8 Leds and light them one by one then switch them off one by one.
- PWM signal with f =50hz
- Controlled counter with switch on the same 8 leds that represents numbers from zero to 8

Notes:

- Select one task and make it in register level
- All tasks must be implemented in hardware and documented with a video on the group
